

Nicholas Fells MA C.Eng M.I.Chem.E

A highly experienced and versatile Process Safety and Risk engineer with 25 years in Oil & Gas (the last ten in Kazakhstan, Singapore, Oman, Indonesia and Brunei). Roles include Manager, Consultant, Technical Authority, Facilitator, Trainer, Lead engineer

Specialising in major HSE risk management, process safety, asset integrity assurance and advice to Senior Management on matters of Risk. An HSE all-rounder and accomplished communicator. Experienced and knowledgeable in all aspects of Process Safety, Integrity Assurance, Inherently Safer Design (ISD), HSE management systems, Human Factors Engineering and demonstration of ALARP. Extensive experience in leading HAZOP and HAZID studies

He believes no organisation will succeed without understanding its risk profile, deciding rationally how to control each of its major risks, following "best practice" and learning lessons where mistakes have been made (by themselves and by others)

In 2013 he was appointed by Total to the position of HSE Engineering Manager for North Caspian Operating Company, the operator of Kashagan. Previously he worked for British Petroleum in Singapore, Petroleum Development Oman, Premier Oil, Brunei Shell, Perenco UK, ARCO British, AMEC and Genesis.
